FunscriptForge v0.5.0-alpha

The screenshot displays the FunscripForge v0.5.0-alpha software interface. At the top, the project title 'Aftermath — Director's Cut' is shown, along with a timeline of 9:32 and 23 phrases. The main workspace features a timeline with a waveform and a 'PHRASES' section. The 'EDIT BY' section shows 'Pattern' and 'Behavior tag' options. The 'BEHAVIORAL TAGS' list includes 'Stingy', 'Giggle', 'Plateau', 'Drift', 'Half-stroke', and 'Drone'. The 'TRANSFORM' panel on the right is set to 'Amplitude Scale' with the 'Behavior' category selected and the 'Passthrough' transform applied. A status bar at the bottom indicates 'Phrase / pattern / tag edits committed'.

POSITION STYLE

Applied to phrase 1.

None

No secondary motion. Device stays centered. Use for stillness or transitions.

Cowgirl

Rocking

Pitch follows stroke. Gentle roll sway grows with speed. Subtle twist.

Missionary

Side-to-side

Roll dominant, driven by stroke velocity. Gentle pitch sine. No twist.

Doggy

Forward

Pitch only — strongly biased forward on every stroke. Minimal other motion.

Drift

Random (one)

Multi-axis curves configured.

FINAL STEP

Export

Write the final funscript and any estim channel files into your output folder, organized into subfolders by device class. The forge log travels with the file.

EXPORT PREVIEW final funscript • all accepted transforms applied

fresh

EXPORT OPTIONS

☒ Blend seams
Detects high-velocity jumps at phrase boundaries and applies targeted smoothing only at those seams.

☒ Final smooth
Light global low-pass pass that removes residual sharp edges.

☒ Include color heatmap PNG
Writes a velocity-colored heatmap of the main funscript next to the export.

☒ Include estim audio files (WAV)
Renders stereo WAV from the alpha/beta channel funscripts. Play directly on your estim device.

COMPLETED TRANSFORMS 7

RECOMMENDED TRANSFORMS 8

FINAL FORGE SCORE

87 / 100 A

+12 from when you imported. Strong on tone alignment and beat density. Slight room on amplitude contrast and BPM ceiling vs device.

① Score travels with the export inside _forge_log. Reopens as the "imported" baseline next time.
